Backend Engineer

Experience

Backend Engineer (Part-time)

[Realy](#)

📅 Feb 2026 — Ongoing 📍 Remote

- Maintain two Elixir/Phoenix applications: a real-time chat service and a push notification service
- Contribute fixes and improvements to a Ruby on Rails codebase

Backend Developer

[Blockscout](#)

📅 Nov 2022 — Ongoing 📍 Remote

- Built Ethereum Beacon Deposits feature, including an Elixir library integrating a Rust cryptography library via NIFs
- Designed and implemented advanced filters from the ground up — a complex feature requiring significant database optimization and query engineering
- Led zero-downtime account authorization migration: replaced Auth0's hosted UI with a custom backend API, implementing on-demand state migration for existing users
- Migrated 200k+ users from 50+ Blockscout instances across several Auth0 tenants into a single self-hosted Keycloak realm
- Integrated distributed Erlang inter-pod communication, researching and configuring Helm charts for Erlang clustering in Kubernetes
- Created reusable cursor-based pagination tooling, now the standard pattern across the codebase, eliminating a class of recurring edge-case bugs

Education

BSc Computer Science

Innopolis University

📅 2020 — 2024 📍 Innopolis

Functional Programming in Haskell — Part 2

[Computer Science Center / Stepik](#)

📅 2022

Functional Programming in Haskell

[Computer Science Center / Stepik](#)

📅 2021

Technologies

Elixir, Phoenix, PostgreSQL, Ruby on Rails, Rust, Haskell, Kubernetes, Docker

Projects

Elixirium

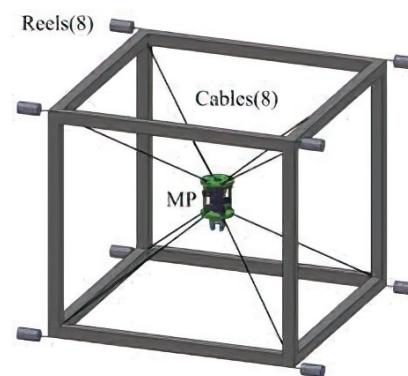

Programming language that compiles to EVM bytecode, built with Elixir. Supports most popular ERC standards (ERC-20, ERC-721).

Haskell Telegram bot

Telegram bot with custom inline keyboard UI and graph-based statistics rendering. Backed by a separate [REST API](#) built with Servant.

Backend for a robot-control application

C++ backend with a Qt interface controlling a robot via parallel cable drive. Handled real-time coordinate computation and motor synchronization.

Achievements

- T-Bank CTF 2025 — top-3 out of 5000+ teams
- NTI 2021 Olympiad Finalist — Automation of Business Processes (student track)
